PROFESSIONAL SUMMARY

Final-year IT student specializing in **Generative AI**, **Machine Learning**, and **Full-Stack Development**. Expert in building **RAG pipelines**, LLM-integrated systems, and predictive healthcare models. Solved **390+ algorithmic problems** on LeetCode/GFG. Proven ability to translate complex data into scalable AI solutions.

EDUCATION

B.Tech in Information Technology, Kalyani Govt. Engineering College Expected May 2026
GPA: 7.16 / 10.0 • **Core:** Data Structures (DSA), DBMS, OS, Computer Networks.

Diploma in Computer Science, Dr. Meghnad Saha Institute of Technology 2020 – 2023
CGPA: 9.0 / 10.0 • **Core:** Object Oriented Programming, Software Engineering, Python.

TECHNICAL SKILLS

- **AI Machine Learning:** Python, RAG, LangChain, Gemini Pro, Hugging Face Hub, FAISS, TensorFlow.
- **Web Mobile:** React.js, Django, Node.js, Android Development (Java/XML), Streamlit, JWT, SQL.
- **Programming:** Python (Expert), Java, C++, SQL, JavaScript (ES6+).
- **Tools DevOps:** Git, GitHub, Docker, Linux (Ubuntu), Postman, Android Studio, VS Code, Render.

PROJECTS

- **Rupam's GPT: Multi-PDF Chat System (GenAI/RAG)** [\[GitHub\]](#)
 - Built an end-to-end **RAG pipeline** using **LangChain** and **Gemini Pro** for multi-document querying.
 - Implemented **FAISS** for vector storage and **PyPDF2** for automated text extraction and chunking.
- **Gemini API Intelligent Q&A System** [\[GitHub\]](#)
 - Developed a real-time question-answering application utilizing the **Google Gemini Pro** model.
 - Optimized prompt logic to handle diverse user queries, delivering high-accuracy responses via **Streamlit**.
- **AI Health Bot (LLM Integration)** [\[GitHub\]](#)
 - Developed a specialized medical query bot leveraging **Hugging Face Hub** and open-source LLMs.
 - Designed custom prompt templates to provide context-aware responses to health-related inquiries.
- **Breast Cancer Classification (Advanced ML)** [\[GitHub\]](#)
 - Engineered a predictive model for medical diagnostics using deep learning and clinical parameters.
 - Conducted feature scaling and model evaluation using **Scikit-learn** to ensure diagnostic precision.
- **Native Android Computer Vision App**
 - Created a mobile application using **Java** and **TensorFlow Lite** for real-time pig breed identification.
 - Optimized for **Edge AI** deployment, ensuring low-latency inference in offline agricultural settings.
- **Full-Stack Task Management Platform**
 - Built a responsive web app with **React** and **Django** featuring secure **JWT authentication**.
 - Managed state with React Hooks and optimized **PostgreSQL** queries for real-time data handling.

CERTIFICATIONS & ACHIEVEMENTS

- **Problem Solving:** Successfully solved **390+ algorithmic problems** across LeetCode and GeeksforGeeks platforms.
- **Strategic Thinking:** Former School Level **Chess Champion**; utilize logic for system architecture and debugging.
